

NEW PRODUCT RELEASE

MODEL: FM8062-V1

PRODUCT NAME: Thermal Module

FEATURES:

Mesure Temperature ranging -40 ~ +500deg Celsius Up to 6M

Resolution: 80 x 62

FOV: 44deg/ 90deg

Detection Distance: 0.5M ~ 6M

OS Support: Windows, Linux, Android, ARM-based

USB/SPI Interface

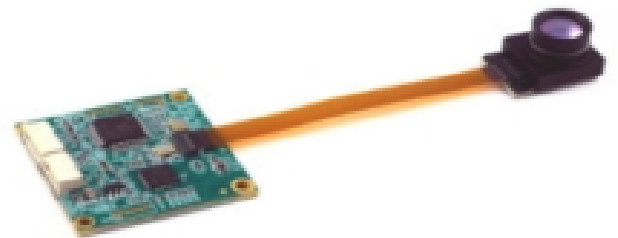

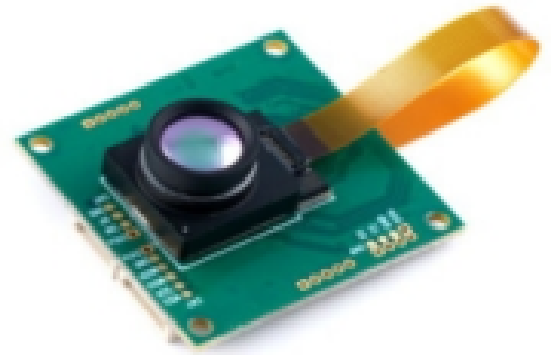

DESCRIPTION:

Synertron's Thermal Module Solution Ready to Read Human Body/Gas/Heat Temperatures

FM8062-V1 is the LWIR thermal module with embedded algorithm where the temperature accuracy would be +/-0.3 degree Celsius taking on human body within 2M. It would also be the perfect solution for hazardous environmental prevention such as gas-leak and fire detections. FM8062-V1, the USB interface, is simply plugged in and read. It supports Windows, Linux, Android, and ARM-based operating systems.
